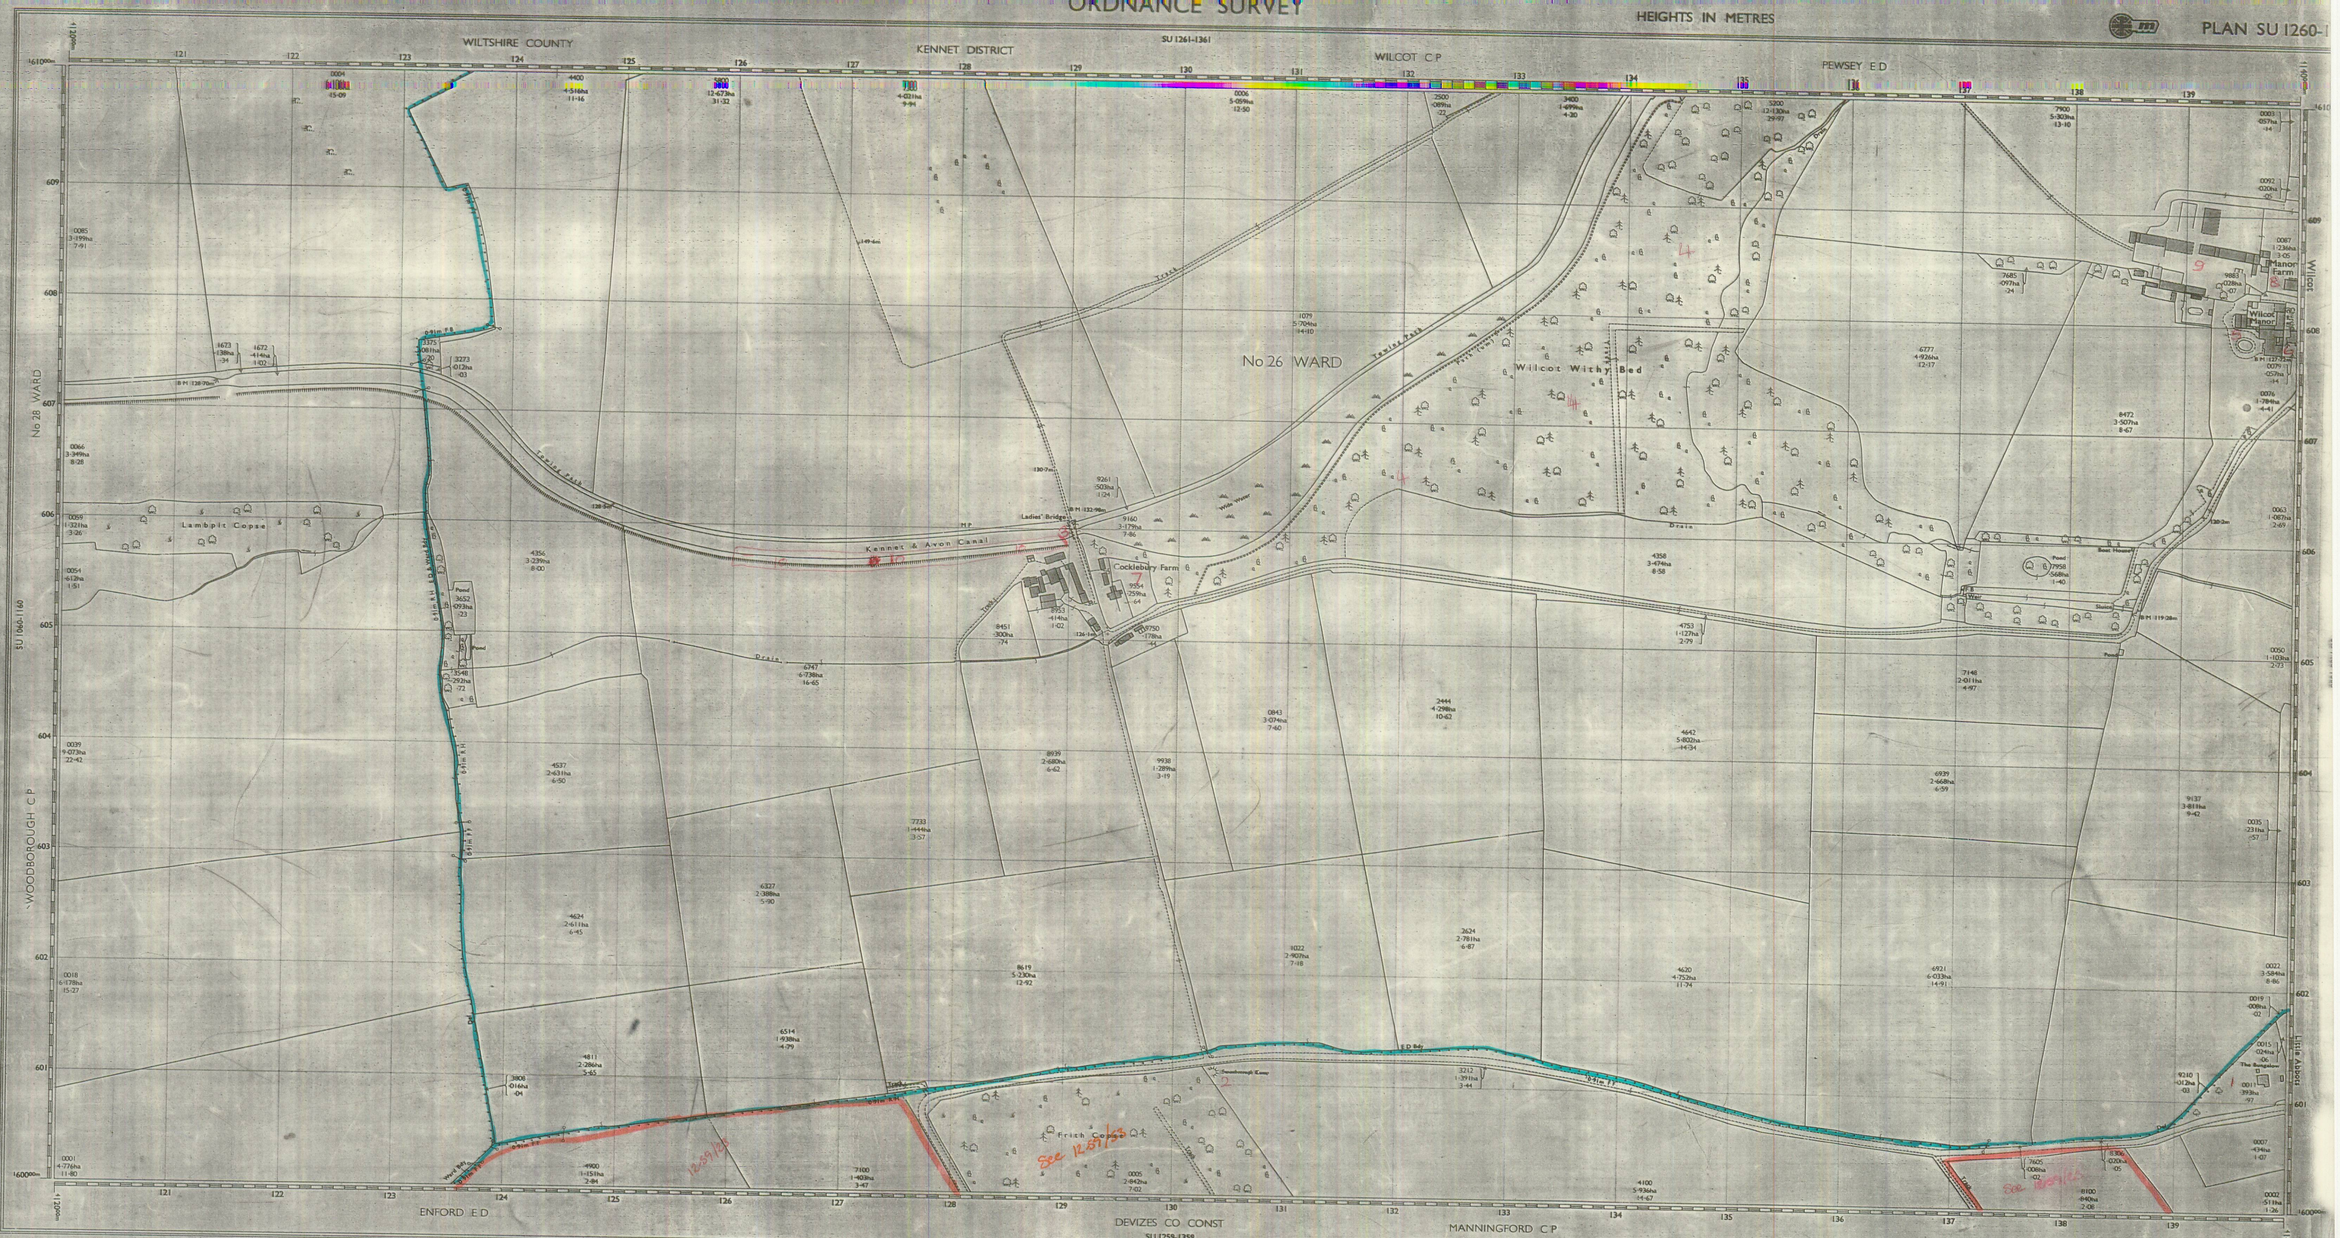
NATIONAL GRID PLANS Scale 1:2500

ORDNANCE SURVEY

HEIGHTS IN METRES

PLAN SU 1260-1



Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILATION DATA

(b) Jun 1975

Levelled.....1957
Boundaries.....Sep 1975

1:1250 scale → 1:1250 scale (photographically reduced)

(a) Surveyed.
(b) Reconstructed from former County Series plans and revised.
(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or: to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.

Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.

The alignment of tunnels where shown is approximate.

Imperial equivalents for metric boundary marerings

Made and published by the Director General of the Ordnance Survey, Southampton.

AREAS

Area measurement, is on plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 1·267 ..... parcel number
1·809ha ..... area in hectares
4·47 ..... area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area .....
Limit of area within which individual parcels are not shown .....
To convert hectares to acres multiply by 2·4711 68
To convert acres to hectares multiply by 0·404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metres intervals. To give a unique reference defining the position of a point no within 10 metres proceed as follows:-

EXAMPLE (from sheet TQ 0527)

1. Take the two letters preceding the sheet number ..... TQ
2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin 058
Eastness (east of western) from the grid line by the point (distance e) 8
The resulting four figure number is the Easting 0588
3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin 291
Northness (north of southern) from the grid line to the point (distance n) 1
The resulting four figure number is the Northing 2911
4. The full ten metric reference is given by writing first the letters, followed by the Easting and then by the Northing ..... TQ 0588291
