AREAS

Area measurement is to the edge only.
The number and area in hectares (ha) and acres shown within each parcel of land.

EXAMPLE 4267 / 8579ha / 9.47 — parcel number / area in hectares / area in acres

When identifying a parcel is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurements of area shown
Lines of area within which individual parcels are shown
To convert hectares to acres multiply by 2.4710
To convert acres to hectares multiply by 0.4047

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are used in defining the position of a point to within 10 metres prog...

1 Take the two letters preceding this sheet number
2 Take the west edge of the grid square in which the ... read the figures opposite this line on the north or so... Estimate tens or metres from the grid line to the poi... The resulting four figure number is the Easting
3 Take the south edge of the grid square in which the ... read the figures opposite this line on the east or wes... Estimate tens of metres from the grid line to the poi... The resulting four figure number is the Northing
