Boundaries ..... May 1971

† 1:2500 scale
(a) Surveyed
(b) Reconstructed from former County Series plans and revised
(c) Fully revised

Surveys of this area since the publication of this plan may be available. Enquiries should be addressed to the Director General of the Ordinance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.

Bench Marks, Levels and other information relating to heights, which may contain later levelling information than appears on Bench Marks to which no values have been shown, are obtainable from the Director General, Ordinance Survey.

Representation of a road, track or path is no evidence of the existence of a right of way.

The alignment of rivers and streams is approximate.

Imperial Equivalents for Metric Boundary Meerings
0·91m = 3ft. 1·22m = 4ft.

One grid square on this plan represents one hectare.

AREAS

Area measurement is to plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE 0400 — parcel number
0·75ha — area in hectares
1·85ac — area in acres

Water, including rivers, is excluded in calculating the number of the plan on which it falls.
Enclosure boundaries cannot be measured to closer than 0·1 acre.
Limit of area within which individual parcels are not shown.
To convert hectares to acres multiply by 2·4710.
To convert acres to hectares multiply by 0·4047.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metres intervals. To give a reference defining the position of a point to within 10 metres proceed as follows:—

EXAMPLE H in Hartmoor Farm

EASTING
Take west edge of 100 metre square in which point lies and read the figures opposite this line on the north or south margin.
Estimate tens of metres from grid line to the point.
999

NORTHING
Take south edge of 100 metre square in which point lies and read the figures opposite this line on the east or west margin.
Estimate tens of metres from grid line to the point.
