
Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILATION DATA

(b) Apr 1978

Levelled.....1967
Boundaries....Nov 1978

T 1:2500 scale
(a) Surveyed.
(b) Reconstructed from former County Series plans and revised.
(c) Revised.

* 1:1250 scale (photographically reduced)

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.

Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.

The alignment of tunnels where shown is approximate.

BOUNDARIES

ENGLAND & WALES — SCOTLAND

County.....Region or Islands Area
District.....District
London Borough
Civil Parish (England)
Community (Wales) } ..... Not shown
Electoral Division.....Electoral Division
Ward.....Ward
Constituency (Co or Boro).....Constituency (Co or Burgh)

E D Bdy
Ward Bdy
Boro Const Bdy — Burgh Const Bdy
Co Const Bdy

Coincident boundaries are shown by the first appropriate symbol above, e.g. Boro Const & E D Bdy

For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area adjoins.

Boundary mereings

B B.....Base of Bank
C B.....Centre of Bank
C E L.....Centre of Electric Line
C D.....Centre of Drain, etc.
C R.....Centre of Road, etc.
C S.....Centre of Stream, etc.
D.....Defaced
E K.....Edge of Kerb
F F.....Face of Fence
F W.....Face of Wall
R H.....Root of Hedge
S R.....Side of River, etc.
T B.....Top of Bank
Tk H.....Track of Hedge
Tk S.....Track of Stream
Und.....Undefined

Imperial equivalents for metric boundary mereings
0·91m = 3ft 1·22m = 4ft

Made and published by the Director General of the Ordnance Survey, Southampton.

AREAS

Area measurements are to plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

4267.....parcel number
EXAMPLE: 1·829ha.....area in hectares
4·47.....area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area.....1
Limit of area within which individual parcels are not shown.....1

To convert hectares to acres multiply by 2·471 05
To convert acres to hectares multiply by 0·404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:—

1. Take the two letters preceding the sheet number.....TQ
2. Take the west edge of the grid square in which the point lies and read the figures appropriate this line on the north or south margin.....058
   Estimate tens of metres from the grid line to the point (distance x).....8
   The resulting four figure number is the Easting.....0588
3. Take the south edge of the grid square in which the point lies and read the figures appropriate this line on the east or west margin.....291
   Estimate tens of metres from the grid line to the point (distance y).....6
   The resulting four figure number is the Northing.....2916
4. The full ten metre reference is given by writing first the letters,
   followed by the Easting and then by the Northing.....TQ 05882916

EXAMPLE from sheet TQ 0529
