NATIONAL GRID PLANS Scale 1:2500

ORDNANCE SURVEY

HEIGHTS IN METRES

PLAN SU 0263-036

SPARE NUMBER
15
52

Map and published by the Director General of the Ordnance Survey, Southampton.

COMPILED BY: 1957
Levelled: 1957
Boundaries: May 1975

1:2500 scale
1:1250 scale (photographically reduced)

(a) Surveyed
(b) Resurveyed from former County Series plans and revised
(c) Revised

HEIGHTS are given in METRES above the Newlyn Datum.
Bench marks, which may denote base levelling information and particulars of bench marks, are indicated by the letters B.M. and the number of the bench mark.
The representation of the ground is by the contour lines, which are drawn at 10-metre intervals, except where otherwise indicated.

SYMBOLS

Boundaries

England & Wales

Scotland

National Grid Reference

1. Take the easting of the grid square in which the point lies and add the figure number of the point in the easting.

2. Take the northing of the grid square in which the point lies and add the figure number of the point in the northing.

3. The resulting four-figure number is the National Grid Reference.

4. The last two figures of the National Grid Reference are the Easting and Northing of the point.

5. The last two figures of the National Grid Reference are the Easting and Northing of the point.

6. The last two figures of the National Grid Reference are the Easting and Northing of the point.

7. The last two figures of the National Grid Reference are the Easting and Northing of the point.

8. The last two figures of the National Grid Reference are the Easting and Northing of the point.

9. The last two figures of the National Grid Reference are the Easting and Northing of the point.

10. The last two figures of the National Grid Reference are the Easting and Northing of the point.

11. The last two figures of the National Grid Reference are the Easting and Northing of the point.

12. The last two figures of the National Grid Reference are the Easting and Northing of the point.

13. The last two figures of the National Grid Reference are the Easting and Northing of the point.

14. The last two figures of the National Grid Reference are the Easting and Northing of the point.

15. The last two figures of the National Grid Reference are the Easting and Northing of the point.

16. The last two figures of the National Grid Reference are the Easting and Northing of the point.

17. The last two figures of the National Grid Reference are the Easting and Northing of the point.

18. The last two figures of the National Grid Reference are the Easting and Northing of the point.

19. The last two figures of the National Grid Reference are the Easting and Northing of the point.

20. The last two figures of the National Grid Reference are the Easting and Northing of the point.

21. The last two figures of the National Grid Reference are the Easting and Northing of the point.

22. The last two figures of the National Grid Reference are the Easting and Northing of the point.

23. The last two figures of the National Grid Reference are the Easting and Northing of the point.

24. The last two figures of the National Grid Reference are the Easting and Northing of the point.

25. The last two figures of the National Grid Reference are the Easting and Northing of the point.

26. The last two figures of the National Grid Reference are the Easting and Northing of the point.

27. The last two figures of the National Grid Reference are the Easting and Northing of the point.

28. The last two figures of the National Grid Reference are the Easting and Northing of the point.

29. The last two figures of the National Grid Reference are the Easting and Northing of the point.

30. The last two figures of the National Grid Reference are the Easting and Northing of the point.

31. The last two figures of the National Grid Reference are the Easting and Northing of the point.

32. The last two figures of the National Grid Reference are the Easting and Northing of the point.

33. The last two figures of the National Grid Reference are the Easting and Northing of the point.

34. The last two figures of the National Grid Reference are the Easting and Northing of the point.

35. The last two figures of the National Grid Reference are the Easting and Northing of the point.

36. The last two figures of the National Grid Reference are the Easting and Northing of the point.

37. The last two figures of the National Grid Reference are the Easting and Northing of the point.

38. The last two figures of the National Grid Reference are the Easting and Northing of the point.

39. The last two figures of the National Grid Reference are the Easting and Northing of the point.

40. The last two figures of the National Grid Reference are the Easting and Northing of the point.

41. The last two figures of the National Grid Reference are the Easting and Northing of the point.

42. The last two figures of the National Grid Reference are the Easting and Northing of the point.

43. The last two figures of the National Grid Reference are the Easting and Northing of the point.

44. The last two figures of the National Grid Reference are the Easting and Northing of the point.

45. The last two figures of the National Grid Reference are the Easting and Northing of the point.

46. The last two figures of the National Grid Reference are the Easting and Northing of the point.

47. The last two figures of the National Grid Reference are the Easting and Northing of the point.

48. The last two figures of the National Grid Reference are the Easting and Northing of the point.

49. The last two figures of the National Grid Reference are the Easting and Northing of the point.

50. The last two figures of the National Grid Reference are the Easting and Northing of the point.

51. The last two figures of the National Grid Reference are the Easting and Northing of the point.

52. The last two figures of the National Grid Reference are the Easting and Northing of the point.

53. The last two figures of the National Grid Reference are the Easting and Northing of the point.

54. The last two figures of the National Grid Reference are the Easting and Northing of the point.

55. The last two figures of the National Grid Reference are the Easting and Northing of the point.

56. The last two figures of the National Grid Reference are the Easting and Northing of the point.

57. The last two figures of the National Grid Reference are the Easting and Northing of the point.

58. The last two figures of the National Grid Reference are the Easting and Northing of the point.

59. The last two figures of the National Grid Reference are the Easting and Northing of the point.

60. The last two figures of the National Grid Reference are the Easting and Northing of the point.

61. The last two figures of the National Grid Reference are the Easting and Northing of the point.

62. The last two figures of the National Grid Reference are the Easting and Northing of the point.

63. The last two figures of the National Grid Reference are the Easting and Northing of the point.

64. The last two figures of the National Grid Reference are the Easting and Northing of the point.

65. The last two figures of the National Grid Reference are the Easting and Northing of the point.

66. The last two figures of the National Grid Reference are the Easting and Northing of the point.

67. The last two figures of the National Grid Reference are the Easting and Northing of the point.

68. The last two figures of the National Grid Reference are the Easting and Northing of the point.

69. The last two figures of the National Grid Reference are the Easting and Northing of the point.

70. The last two figures of the National Grid Reference are the Easting and Northing of the point.

71. The last two figures of the National Grid Reference are the Easting and Northing of the point.

72. The last two figures of the National Grid Reference are the Easting and Northing of the point.

73. The last two figures of the National Grid Reference are the Easting and Northing of the point.

74. The last two figures of the National Grid Reference are the Easting and Northing of the point.

75. The last two figures of the National Grid Reference are the Easting and Northing of the point.

76. The last two figures of the National Grid Reference are the Easting and Northing of the point.

77. The last two figures of the National Grid Reference are the Easting and Northing of the point.

78. The last two figures of the National Grid Reference are the Easting and Northing of the point.

79. The last two figures of the National Grid Reference are the Easting and Northing of the point.

80. The last two figures of the National Grid Reference are the Easting and Northing of the point.

81. The last two figures of the National Grid Reference are the Easting and Northing of the point.

82. The last two figures of the National Grid Reference are the Easting and Northing of the point.

83. The last two figures of the National Grid Reference are the Easting and Northing of the point.

84. The last two figures of the National Grid Reference are the Easting and Northing of the point.

85. The last two figures of the National Grid Reference are the Easting and Northing of the point.

86. The last two figures of the National Grid Reference are the Easting and Northing of the point.

87. The last two figures of the National Grid Reference are the Easting and Northing of the point.

88. The last two figures of the National Grid Reference are the Easting and Northing of the point.

89. The last two figures of the National Grid Reference are the Easting and Northing of the point.

90. The last two figures of the National Grid Reference are the Easting and Northing of the point.

91. The last two figures of the National Grid Reference are the Easting and Northing of the point.

92. The last two figures of the National Grid Reference are the Easting and Northing of the point.

93. The last two figures of the National Grid Reference are the Easting and Northing of the point.

94. The last two figures of the National Grid Reference are the Easting and Northing of the point.

95. The last two figures of the National Grid Reference are the Easting and Northing of the point.

96. The last two figures of the National Grid Reference are the Easting and Northing of the point.

97. The last two figures of the National Grid Reference are the Easting and Northing of the point.

98. The last two figures of the National Grid Reference are the Easting and Northing of the point.

99. The last two figures of the National Grid Reference are the Easting and Northing of the point.

100. The last two figures of the National Grid Reference are the Easting and Northing of the point.
