Marsh, saltings	Change of boundary marking	Revision point
Reeds	see AREAS notes	Revision point & bench mark coincident

VEGETATION CLASSIFICATION: Where space permits, tree and scrub symbols in woods are shown in groups of four, three, two or single to indicate dense, medium, open or scattered density of trees or scrub.

BOUNDARIES

England & Wales	Scotland
County	Geographical County
District	County Council
Local Authority	County of the City
Electoral Division	Borough
Ward	City of London
Parish	City of London
Parish	City of London

Where boundaries coincide the symbol shown is the first applicable in the table above, e.g. ...

New boundary symbols adopted for England and Wales 1974.

AREAS

Area measurement is to plan only.

The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 1 807ha 1 807ha 1 807ha

When identifying a parcel it is important to specify the number of the plan on which it falls.

Limit of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2.471 05.

To convert acres to hectares multiply by 0.404 69.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE from sheet TQ 0829

1. Take the two letters preceding the sheet number.....TQ

2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin.....08

3. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin.....29

4. The full grid reference is given by writing first the letters, followed by the Easting and then by the Northing.....TQ 082916
