

MADE AND PUBLISHED BY THE DIRECTOR GENERAL OF THE ORDNANCE SURVEY, SOUTHAMPTON.

CONVERSION SCALES

1 metre = 3.2808 feet

1 foot = 0.3048 metre

1 hectare = 2.47105 acres

1 acre = 4.04686 hectares

1 square kilometre = 247.105 hectares

1 square mile = 633.54 hectares

1 square mile = 640 acres

1 square mile = 259.0 square metres

1 square mile = 259.0 square kilometres

1 square mile = 259.0 square miles

COMPILATION DATA

Levelled.....1956

Boundaries.....Dec 1974

(a) Surveyed

(b) Reconstructed from former County Series plan and revised.

(c) Revised.

HEIGHTS are given in METRES above the Newlyn Datum.

Bench mark lines, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.

The alignment of tunnels where shown is approximate.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metres intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:-

EXAMPLE: From sheet TQ 0529

1. Take the two letters preceding the sheet number.....TQ

2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin.....058

3. Take the east edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin.....291

4. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing.....TQ 058 291

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'.
