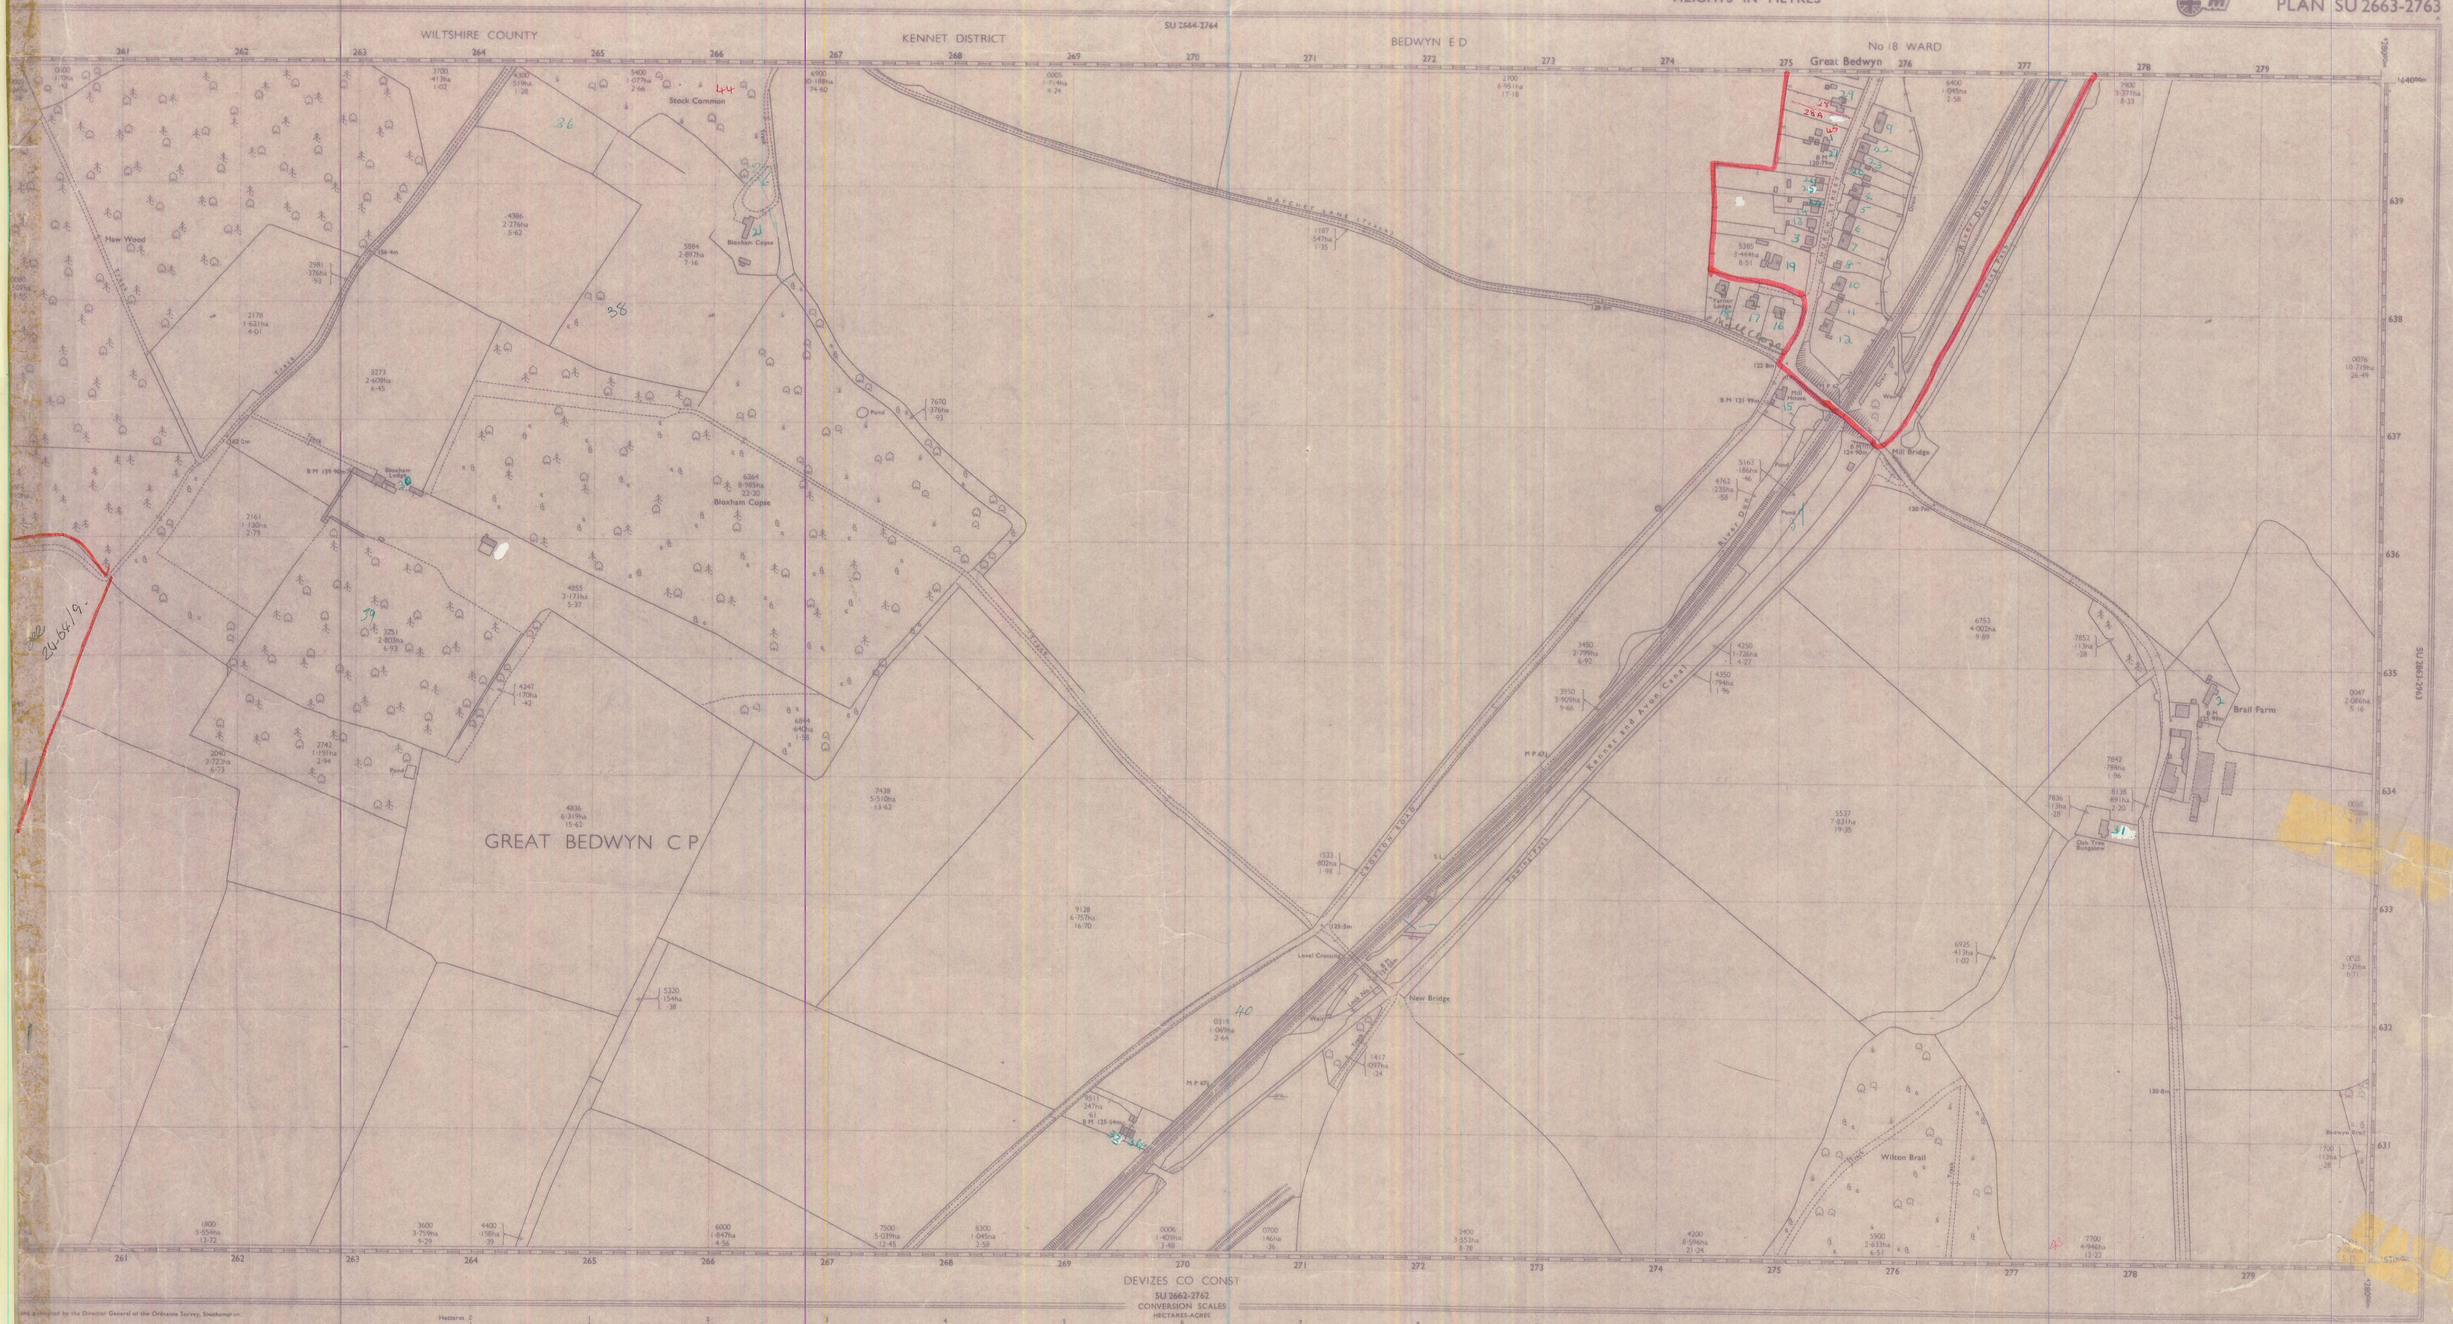
NATIONAL GRID PLANS Scale 1:2500

ORDNANCE SURVEY

HEIGHTS IN METRES

PLAN SU 2663-2763



Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILATION DATA

(b) Sep 1975

Levelled.....1956,57
Boundaries ....Nov 1975

(1) 1:1500 scale * (1:1250 scale (photographically reduced)
(2) Surveyed.
(3) Reconstituted from former County Series plans and revised.
(4) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.

Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.

The alignment of cornish where shown is approximate.

SU 2663-2763

Constituency (Co or Burgh)

Coincident boundaries are shown by the first appropriate symbol above, e.g. Boro Const & E D Bdy

For Ordnance Survey purposes County Boundary is deemed so be the line of the parish structure whether or not a parish area adjoins.

Boundary mereings

B B	Base of Bank	C R	Centre of Road, etc.	F F	Face of Fence
C B	Centre of Bank	C S	Centre of Stream, etc.	F W	Face of Wall
C C S	Centre of Covered Stream	Def	Defaced	R H	Root of Hedge
C O	Centre of Drain, etc.	E K	Edge of Kerb	S R	Side of River, etc.
T B	Top of Bank				
Tk H	Track of Hedge				
Tk S	Track of Stream				
Und	Undefined				

Imperial equivalents for metric boundary marcings
0·91m = 3ft 1·22m = 4ft

Made and published by the Director General of the Ordnance Survey, Southampton.

AREAS

Areas measurements are to plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4267 .....parcel number
1·800ha .....area in hectares
4·47 .....area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Embankments or featured joined for measurement of area .....
Limits of area within which individual parcels are not shown .....

To convert hectares to acres multiply by 2·471 05
To convert acres to hectares multiply by 0·404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:—

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number. TQ
2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. Estimate tenths of metres from the grid line to the point (distance e). 292 058 8
   The resulting four figure number is the Easting. 0588
3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. Estimate tenths of metres from the grid line to the point (distance n). 291 29 6
   The resulting four figure number is the Northing. 2916
4. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing. TQ 0588291
