One grid square on this plan represents one hectare.

Made and published by the Director General of the Ordnance Survey, Southampton.

AREAS

Area measurement is on plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

4267.....parcel number
EXAMPLE: 1·809ha.....area in hectares
4·47.....area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Inclosures or features joined for measurement of area.....§
Limit of area within which individual parcels are not shown.....†

To convert hectares to acres multiply by 2·4711 05
To convert acres to hectares multiply by 0·404 69

NATIONAL GRID REFERENCE

The grid lines form part of the national grid and are at 100 metre intervals. To give a reference defining the position of a point to within 10 metres proceed as follows:—

EXAMPLE: H in Hillfield Copse

EASTING		NORTHING	
Take west edge of 100 metre square in which point lies and read the figures opposite this line on the north or south margin	290	Take south edge of 100 metre square in which point lies and read the figures opposite this line on the east or west margin	505
Estimate tens of metres from grid line to the point	7	Estimate tens of metres from grid line to the point	7
