Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILATION DATA

(b) Aug 1975

Levelled 1968, 69
Boundaries ... Nov 1975

† 1:2500 scale * 1:1250 scale (photographically reduced)
(a) Surveyed
(b) Reconstructed from former County Series plans and revised.
(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is no evidence of the existence of a right of way.
The alignments of cables, where shown, are approximate.

BOUNDARIES

ENGLAND & WALES
County
District
London Borough
Civil Parish (England)
Community (Wales)
Electoral Division
Ward
Constituency (Co or Boro)

SCOTLAND
Region or Islands Area — District
Not shown
Electoral Division — Ward
Constituency (Co or Burgh)

Boro Const Bdy — Ward Bdy — Burgh Const Bdy
E D Bdy — Co Const Bdy

Coincident boundaries are shown by the first appropriate symbol above, e.g. Boro Const & E D Bdy.
For Ordnance Survey purposes County Boundary is deemed so be the limit of the parish structure whether or not a parish area adjoins.

Boundary merearings

B B	Base of Bank	C R	Centre of Road, etc.	F F	Face of Fence	T B	Top of Bank
C B	Centre of Bank	C S	Centre of Stream, etc.	F W	Face of Wall	Tk H	Track of Hedge
C C S	Centre of Covered Stream	Def	Defaced	R H	Root of Hedge	Tk S	Track of Stream
C D	Centre of Drain, etc	E K	Edge of Kerb	S R	Side of River, etc.	Und	Undefined

Imperial equivalents for metric boundary merearings:
0·91m = 3ft 1·22m = 4ft

Made and published by the Director General of the Ordnance Survey, Southampton

AREAS

Area measurements is on plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

4267 ..... parcel number
EXAMPLE: 1·9270ha ..... area in hectares
4·47 ..... area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area.....
Limit of area within which individual parcels are not shown.....

To convert hectares to acres multiply by 2·471 06
To convert acres to hectares multiply by 0·404 69

NATIONAL GRID REFERENCE

The grid lines form parts of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:—

1. Take the two letters preceding the sheet number.
2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. Estimate tens of metres from the grid line to the point (distance w). The resulting four figure number is the Easting.
3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. Estimate tens of metres from the grid line to the point (distance n). The resulting four figure number is the Northing.
4. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing.
