

When selecting a pair of cards it is important to know the value of the cards. The following table presents the point values of the cards.

Limit of area within which individual persons are not shown.....	
To convert hectares to acres multiply by 2.47105.....	
To convert acres to hectares multiply by 0.404686.....	

NATIONAL GRID REFERENCE

The grid lines form a pair of the National Grid and are at 100 metres intervals. To give details the position of a point to within 10 metres presented as follows:-

EXAMPLE

1. Take the two letters preceding the sheet number.....TQ
2. Take the east edge of the grid square in which the point lies and read the figures opposite this on the north or south margin.....056
3. Estimate each of metres from the grid line on the north or south margin. The resulting four figure number is the Northing.....2940
4. Take the south edge of the grid square in which the point lies and read the figures opposite this on the east or west margin.....391
5. Estimate each of metres from the grid line on the east or west margin. The resulting four figure number is the Easting.....2940

The Northing and Easting figures are then written down in the boxes, followed by the Easting and then by the Northing.....TQ 056

For further information see Van introduction to the Projection for Ordnance Survey National Reference System.
