Ward Bdy

Coincident boundaries are shown by the first appropriate symbol above, e.g. Boro Const & E D Bdy

Made and published by the Director General of the Ordnance Survey, Southampton.

AREAS

Area measurement is on plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE:
4267.....parcel number
1·809ha.....area in hectares
4·47.....area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or fissures joined for measurement of area.....†
Limit of area within which individual parcels are not shown.....†

To convert hectares to acres multiply by 2·4711 05
To convert acres to hectares multiply by 0·404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metres intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:—

1. Take the two letters preceding the sheet number.....TQ
2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin.....058 292

EXAMPLE from sheet TQ 0529

98-55
