Levelled: 1957
Boundaries: Mar 1975

(b) Oct 1974

1: 1:2500 scale
2: 1:2500 scale (photographically reduced)

(a) Surveyed
(b) Reconstructed from former County Series plans and revised
(c) Revised

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey Office.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lines, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is evidence of the existence of a right of way.
The alignment of tunnels where shown is approximate.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

- Take the two letters preceding the sheet number.
- Take the west edge of the grid square in which the point lies and read the figure opposite the line on the north or south margin.
- Take the east edge of the grid square in which the point lies and read the figure opposite the line on the east or west margin.
- Take the north edge of the grid square in which the point lies and read the figure opposite the line on the north or south margin.
- Take the south edge of the grid square in which the point lies and read the figure opposite the line on the east or west margin.

The resulting four figure number is the Northing.

The full can be reference is given by writing first the letters, followed by the Northing and then the Easting.

For further information see: An Introduction to the Projection for Ordnance Survey Maps and the National Reference System.
