Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.

Bench Mark Lists which may contain later levelling information, also descriptions of Bench Marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation of a feature as a road, track or path is no evidence of the existence of a right of way.

The alignment of tunnels is shown as approximate.

AREAS

Areas measurements is to plan edge only
The number and area, in hectares (ha) and acres, is shown within each parcel of land:

EXAMPLE: 8400 ..... parcel number
1·809ha ..... area in hectares
4·47 ..... area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area .....
Limit of area within which individual parcels are not shown .....
To convert hectares to acres multiply by 2·47105
To convert acres to hectares multiply by 0·4047

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a reference defining the position of a point to within 10 metres proceed as follows —

EXAMPLE: R in Rickpiece Plantation

EASTING		NORTHING	
Take west edge of 100 metre square in which point lies and read the figures opposite this line on the north or south margin	996	Take south edge of 100 metre square which point lies and read the figures opposite this line on the east or west margin	636
Estimate tens of metres from grid line to the point	5	Estimate tens of metres from grid line to the point	6
