PLAN SU 1073-1173

COMPILATION DATA

Levelled.....1966,67

Boundaries ....Aug 1977

† 1:2500 scale * 1:1250 scale (photographically reduced)

(a) Surveyed.

(b) Reconstructed from former County Series plans and revised.

(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.

Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.

The alignment of tunnels where shown is approximate.

Imperial equivalents for metric boundary mereings:

0·91m = 3 ft 1·37m = 4½ ft

One grid square on this plan represents one hectare.

Made and published by the Director General of the Ordnance Survey, Southampton.

AREAS

Area measurement is to plan edge only.

The number and area, in hectares (ha) and acres, is shown within each parcel of land.

4267 ..... parcel number

EXAMPLE: 1·809ha ..... area in hectares

4·47 ..... area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.

Enclosures or features joined for measurement of area .....†

Limit of area within which individual parcels are not shown .....†

To convert hectares to acres multiply by 2·471 05

To convert acres to hectares multiply by 0·404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:—

1. Take the two letters preceding the sheet number ..... TQ
2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin..... 058
   Estimate tens of metres from the grid line to the point (distance e)..... 8
   The resulting four figure number is the Easting..... 0588
3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin..... 291
   Estimate tens of metres from the grid line to the point (distance n)..... 6
   The resulting four figure number is the Northing 2916
4. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing ..... TQ 0588 2916.

EXAMPLE from sheet TQ 0529
