COMPILATION DATA

Levelled.....1957
Boundaries.....Jul 1974

1:2500 scale
(b) Oct 1973
1:1250 scale (photographically reduced)
(a) Surveyed
(b) Reconstructed from former County Series plans and revised.
(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is no evidence of the existence of a right of way.
The alignment of tunnels where shown is approximate.

SYMBOLS

Non-coniferous trees	Slopes	Site of antiquity
Coniferous trees	Cliff	Cave entrance
Surveyed trees	Cave entrance	Culvert
Orchard trees	Rock	Direction of water flow
Coppice, over	Boulders	Electricity pylon
Scrub	Sloping masonry	Electricity Transmission Line
Bracken	Roofed building	Traverse station (permanent)
Hedge	Glasshouse	Bench mark
Rough grassland	Archway	Surface level
Marsh/alders	Change of boundary marking	Revision point
Reeds	see AREAS notes	Revision point & bench mark coincident

VEGETATION CLASSIFICATION. Where space permits, tree and scrub symbols in woods are shown in groups of four, three, two or singly to indicate close, medium, open or scattered density of trees or scrub.

AREAS
Area measurement is to plan only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.
EXAMPLE: 1.809ha area in hectares
4.47 area in acres
When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area are shown as one.
Limit of area within which individual parcels are not shown.
To convert hectares to acres multiply by 2.471 05.
To convert acres to hectares multiply by 0.404 69.

NATIONAL GRID REFERENCE
The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:
EXAMPLE from sheet TQ 8529
1. Take the two letters preceding the sheet number.....TQ
2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin.....08
3. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin.....29
4. The full four figure reference is then TQ 0829.
The resulting four figure reference is given by writing first the letters, followed by the Easting and then by the Northing.....TQ 082929.
