THE NATIONAL GRID REFERENCE SYSTEM  
TO GIVE A GRID REFERENCE CORRECT TO 100 METRES  
EXAMPLE CH 1000 150000  
EASTING  
Take west edge of kilometre square in which point lies and read the large figure printed opposite this line on north and south margins. Estimate tenths eastwards.  
NORTHING  
Take south edge of kilometre square in which point lies and read the large figure printed opposite this line on east and west margins. Estimate tenths northwards.  
Full 100 metre reference SU 155479

The full reference, above, is unique. If grid letters are omitted, the resulting reference 155479 recurs at intervals of 100 kilometres. When the area concerned is sufficiently restricted, as will usually be the case with maps on scales of one inch to one mile and larger, the grid letters are normally omitted.

At the eastern edge of this sheet True North is 1° 13' West of Grid North and at the western edge 0° 10' West of Grid North. Magnetic North was about 2° West of Grid North in 1975 decreasing by about 1° in five years.
