

COMPILED DATA

Levelled.....1957
Boundaries.....Jun 1976

1:2500 scale
(b) Apr 1976

1:1250 scale (photographically reduced)

(a) Surveyed.
(b) Reconstructed from former County Series plans and revised.
(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.

Bench marks, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.

The alignment of tunnels where shown is approximate.

BOUNDARIES

England and Wales: County, District, Civil Parish (England), Community (Wales), Electoral Division, Ward, Constituency (Co or Borough)

Scotland: Region or Island Area, District, Civil Parish (Scotland), Electoral Division, Ward, Constituency (Co or Borough)

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point on the map, the grid square in which the point lies and the number and letter of the grid square in which the point lies, are shown within each grid square.

EXAMPLE: From sheet TQ 0529

1. Take the two letters preceding the sheet number.....TQ 292

2. Take the east edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin.....058

3. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin.....291

4. The full four-figure reference is given by writing first the letters, followed by the figure from the north or south margin, then the figure from the east or west margin.....TQ 058291

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'.

AREAS

Area measurement is to plan edge only.

The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: From sheet TQ 0529

4267 parcel number

1.857ha area in hectares

4.47 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area, are shown within each parcel of land.

To convert hectares to acres multiply by 2.471 05

To convert acres to hectares multiply by 0.4047

20,64
