THE NATIONAL GRID
TO GIVE A GRID REFERENCE CORRECT TO 100 METRES

EXAMPLE
The Grid Letters on this sheet are SU

EAST Take west edge of kilometre square in which point lies and read the large figures printed opposite this line on north or south margin. Estimate tenths Eastwards	NORTH Take south edge of kilometre square in which point lies and read the large figures printed opposite this line on east or west margin. Estimate tenths Northwards
23	66
23	67

Full 100 Metre Reference SU 233667

The above Full Reference is unique. For many purposes the first grid letter can be omitted, giving a reference, U 233667 which recurs at intervals of 500 Kilometres. If both grid letters are omitted, the resulting reference 233667 recurs at intervals of 100 Kilometres. When the area concerned is sufficiently restricted, as will usually be the case, with maps on scales of one inch to the mile and larger, both the grid letters are normally omitted.

At the Eastern edge of this sheet True North is 0°17' West of Grid North and at the Western edge 0°13' West of Grid North.

Magnetic North was about 9° West of Grid North in 1961 decreasing by about 1" in four years. Heights are in feet above Mean Sea Level at Newlyn.

1 square inch on this map represents 1778 acres on the ground.
