

MADE AND PUBLISHED BY THE DIRECTOR GENERAL OF THE ORDNANCE SURVEY, SOUTHAMPTON.

SU 2257-2357
CONVERSION SCALES
HECTARES/ACRES

1 Hectare = 2.471 acres
1 Acre = 0.4047 hectares

1 Metre = 3.2808 feet
1 Foot = 0.3048 metres

COMPILATION DATA

Levelled: 1958
Boundaries: Mar 1975

1:2500 scale
1:1250 scale (photographically reduced)

(a) Surveyed.
(b) Reconstructed from former County Series plans and revised.
(c) Revised.

HEIGTHS are given in METRES above the Newlyn Datum.
Bench marks, which may contain level information and particulars of bench marks to which no return has been shown, are obtainable from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is evidence of the existence of a right of way.
The alignment of tunnels where shown is approximate.

NATIONAL GRID REFERENCE

The grid lines form part of the Ordnance Survey and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number: TQ 0529

2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin: 058

3. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin: 291

4. The resulting four figure number is the Northing: 058 291

5. The full six figure reference is given by writing first the letters, followed by the Easting and then by the Northing: TQ 0582916

For further information see 'An Introduction to the Precision for Ordnance Survey Maps and the National Reference System.'
