CONVERSION SCALES
HECTARES ACRES

Made and published by the Director General of the Ordnance Survey, Southampton.

AREAS

Area measurement is to plan edge only.

The number and area, in hectares (ha) and acres, is shown within each parcel of land.

4267 parcel number

When identifying a parcel it is important to specify the number of the plan on which it is shown.

Enclosures or features joined for of area

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference to a point to within 10 metres proceed as follows:—

EXAMPLE from sheet 100 000 000

Take the two letters preceding the sheet number.....TQ 058
Take the west edge of the grid square in which the point lies and 292

Estimate tens of metres from the grid line to the point (distance c)..... 8

3. Take the south edge of the grid square in which the point lies and extend it to the east or west margin.

Estimate tens of metres from the grid line to the point (distance n)..... 6 291
The resulting four figure number is the Northing..... 2916 058

4. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing. TQ 05882916.

For further information see 'An introduction to the Projection for Ordnance Survey Maps', National Reference System.
