THE NATIONAL GRID	
TO GIVE A GRID REFERENCE CORRECT TO 100 METRES	
EXAMPLE	
EAST	NORTH
Take west edge of kilometre square in which point lies and read the large figures printed opposite this line on north or south margin.	Take south edge of kilometre square in which point lies and read the large figures printed opposite this line on east or west margin.
Estimate tenths Eastwards	Estimate tenths Northwards
27	64
Full 100 Metre Reference SU 27642	

The above Full Reference is unique. For many purposes the first grid letter can be omitted, giving a reference, U 27642, which recurs at intervals of 100 Kilometres. If both grid letters are omitted, the resulting reference, 27642, recurs at intervals of 100 Kilometres. When the area concerned is sufficiently restricted, as will usually be the case with maps on scales of one inch to the mile and larger, both the grid letters are normally omitted.

At the Eastern edge of this sheet True North is $0^{\circ} 20'$ West of Grid North and at the Western edge $0^{\circ} 17'$ West of Grid North. Magnetic North was about 9° West of Grid North in 1961 decreasing by about 1° in four years. Heights are in feet above Mean Sea Level at Newlyn.

1 square inch on this map represents 1778 feet on the ground.

REVISION DIAGRAM

Made and published by the Director General of the ORDNANCE SURVEY, CHERESINGTON, SURREY, 1961.
