Survey of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.

Beach mark lists, which may contain later levelling information and particulars of beach marks to which as values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.

The alignment of tunnels where shown is approximate.

AREAS

Area measurement is in hectares only.

The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 1.80ha.....area in hectares

4.47.....area in acres

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 500 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:-

1. Take the two letters preceding the sheet number.....TO 058

2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin.....058

3. Estimate the number of metres from the grid line to the point (distance x).....058

4. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin.....231

5. Estimate the number of metres from the grid line to the point (distance y).....231

The resulting four figure number is the National Grid Reference.....TO 058231

Followed by the Easting and then by the Northing.....TO 058231
