Levelled... 1851, 56, 60, 70

Boundaries... Dec 1876

Survey of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Mean Sea Level.

Beach mark lists, which may contain later levelling information and particulars of beach marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.

The alignment of towns where shown is approximate.

AREAS

Area measurement in this plan is by the plan only.

The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE:

4267 parcel number

1.820ha area in hectares

4.47 area in acres

To convert hectares to acres multiply by 2.47105

To convert acres to hectares multiply by 0.404686

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

1. Take the two letters preceding the sheet number. TO 59

2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin. 292

3. Estimate tens of metres from the grid line to the point. 8

4. The resulting four figure number is the Easting. 5928

5. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin. 29

6. Estimate tens of metres from the grid line to the point. 8

7. The resulting four figure number is the Northing. 2928

8. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing. TO 5928 2928
