THE NATIONAL GRID

TO GIVE A GRID REFERENCE CORRECT TO 100 METRES

EXAMPLE Cherry Farm

The Grid Letters on this sheet are ST

EAST NORTH

Take south edge of kilometre square in which point lies and read the large figures printed opposite this line on east or west margin.

Estimate tenths Eastwards

Estimate tenths Northwards

Full 100 Metre Reference ST 984567

The above Full Reference is unique. For many purposes the first grid letter can be omitted, giving a reference, '984567' which means an interval of 100 Kilometres. If both grid letters are omitted, the resulting reference, 984567, occurs at intervals of 100 Kilometres. When the area concerned is sufficiently restricted, as will usually be the case with maps on scales of one inch to the mile and larger, both the grid letters are normally omitted.

At the Eastern edge of this sheet True North is the same as Grid North and at the Western edge 0° 03' East of Grid North.

Magnetic North was about 9° West of Grid North in 1961, decreasing by about 1" in four years. Heights are in feet above Mean Sea Level at Newlyn.

1 square inch on this map represents 17.75 acres on the ground.

Boundaries which have been verified on the ground are shown in black. Boundaries which have not been verified on the ground are shown in brown.
