THE NATIONAL GRID
TO GIVE A GRID REFERENCE CORRECT TO 100 METRES

EXAMPLE
The Grid Letters on this sheet are ST.

EAST
Take west edge of kilometre square in which point lies and read the large figures printed opposite this line on north or south margin.
Estimate tenths Eastwards.

NORTH
Take south edge of kilometre square in which point lies and read the large figures printed opposite this line on east or west margin.
Estimate tenths Northwards.

Full 100 Metre Reference ST 98159

The above Full Reference is unique. For many purposes the first grid letter can be omitted, giving a reference, T 98159, which recurs at intervals of 500 Kilometres. If both grid letters are omitted, the resulting reference 98159 recurs at intervals of 100 kilometres. When the area concerned is sufficiently restricted, or will usually be the case with maps on scales of one inch to the mile and larger, both the grid letters are normally omitted.

At the Eastern edge of this sheet True North is the same as Grid North and at the Western edge 0° 03' East of Grid North.

Magnetic North was about 1° West of Grid North in 1961, decreasing by about 1" in four years. Heights are in feet above Mean Sea Level as Newlyn.

1 square inch on this map represents 17.78 acres on the ground.

REVISION DIAGRAM

Revised before 1930

Revised 1930-1945

The whole sheet was revised for major changes only in 1956-57.

Boundaries revised to 1-7-60.
