

9565

When identifying a parcel it is important to specify Enclosures of Acres from plan for measurement. Limits of area within which individual parcels are located.

To convert hectares to ares

To convert ares to hectares

no. number of the plan on which it falls

as shown

multiply by 2.471 05

multiply by 0.404 69

NATIONAL GRID

The grid-lines form part of the national grid. The grid-figures determine the position of a point in

EASTING	EXAMPLE	B in	
Take west edge of 100 metres square in which point lies and read the figures opposite this line on the north or south margin			
Estimate case of metres from grid line to the point	\$76		

REFERENCE

are at 100 metres intervals. To give a line at 100 metres proceed as follows—

an House Farm

EASTING	EXAMPLE	B in	
1. south edge of 100 metres square in which point lies and read the figures			
2. east side this line on the east or west margin			
3. east side of metres from grid line to the point			

TEN METRE REFEREN
