

When identifying a particle it is important to specify the number of the plan which it falls onto. Entries are made in the following manner:

Particle	Plan
Limit of area within which individual particles are not shown.	000000
To convert hectares to acres multiply by 2.47105.	000000
To convert acres to hectares multiply by 0.4047	000000

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a reference defining the position of a point to within 10 metres proceed as follows—

EXAMPLE	Easting	Northing
Take west edge of 100 MESTRE square in which point lies and find figure opposite this line on the north or south margin.	93	646
Estimate east of meters from grid line to the point	937	6468
	9373	64688

TEN TEUTER REFERENCE	SU 93736468
