COMPILATION DATA

Levelled..... 1952

Boundaries..... Sep 1976

1:2500 scale

1:1250 scale (photographically reduced)

(a) Surveyed

(b) Reconstituted from former County Series plans and revised

(c) Reconstituted

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.

Bench mark lines, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.

The alignment of tunnels where shown is approximate.

© Crown copyright 1977

AREAS

Area measurement is to plan edge only.

The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4267 parcel number

1.807ha area in hectares

4.47 area in acres

To convert hectares to acres multiply by 2.471 05

To convert acres to hectares multiply by 0.404 69

When identifying a parcel it is important to specify the number of the plan on which it falls.

Enclosures or features joined for measurement of area.....

Limit of area within which individual parcels are not shown.....

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows -

EXAMPLE: from sheet TQ 0529

1. Take the two letters preceding the sheet number..... TQ 0529

2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. Estimate tenths of metres from the grid line to the point (distance a)..... 058

3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. Estimate tenths of metres from the grid line to the point (distance b)..... 291

4. The full ten metre reference is given by writing first the letters followed by the Easting and then by the Northing..... TQ 0589291

For further information see an introduction to the Projection for Ordnance Survey Maps and the National Reference System.
