AREAS
Area measurements in this plan are in hectares (ha) and acres. The number and area of a parcel is shown within each parcel of land.

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area are shown as one enclosure. Limit of area within which individual parcels are not shown. To convert hectares to acres multiply by 2.471 05. To convert acres to hectares multiply by 0.404 69.

NATIONAL GRID REFERENCE
The grid lines form parts of the National Grid and are at 100-metre intervals. To give a unique reference to a point on the map, the grid reference is given by the following:

- 1. Take the two letters preceding the sheet number.
2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin.
3. Take the east edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin.
4. The full ten-figure reference is given by writing first the letters followed by the figure and then by the Northing.
