AREAS
Area measurements in the plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.
EXAMPLE: 4267 parcel number
1.809ha area in hectares
4.47 area in acres
To convert hectares to acres multiply by 2.471 05
To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE
The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:-
EXAMPLE from sheet TQ 0529
TQ 058
291
291
058
059

1. Take the two letters preceding the sheet number..... TQ 058
2. Take the east edge of the grid square in which the point lies and read the figures opposite (the line on the north or south margin)..... 058
3. Take the south edge of the grid square in which the point lies and read the figures opposite (the line on the east or west margin)..... 291
4. The full six figure reference is given by writing first the letters, followed by the Easting and then by the Northing..... TQ 0582916
