**COMPILED DATA**

Levelled Boundaries (b) Oct 1976

Scale: 1:2500 scale, 1:1250 scale (photographically reduced)

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum. Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey. The representation on this plan of roads, tracks or paths is evidence of the existence of a right of way. The alignment of tunnels where shown is approximate.

**NATIONAL GRID REFERENCE**

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

- Take the two figures preceding the sheet number. EXAMPLE: From sheet TQ 0529
- Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. Estimate tens of metres from the grid line to the point (distance 43) 058
- Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. Estimate tens of metres from the grid line to the point (distance 43) 291
- The resulting four-figure number is the Northing. EXAMPLE: 058 291
- The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing. EXAMPLE: TQ 058291

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System.'

VEGETATION CLASSIFICATION. Where space permits, tree and scrub symbols in woods are shown in groups of four, three, two or singly to indicate close, medium, open or scattered density of trees or scrub.

Imperial equivalents for metric boundary markings: 0.91m = 3ft, 1.22m = 4ft
