VEGETATION CLASSIFICATION
 Where space permits, tree and scrub symbols in woods are shown in groups of four: three, one or single to indicate close, medium, open or scattered density of trees or scrub.

BOUNDARY MEASUREMENTS
 England & Wales: B.B., Base of Bank; C.B., Centre of Bank; C.C.S., Centre of Covered Stream; C.D., Centre of Drain, etc.
 Scotland: C.R., Centre of Road, etc.; C.S., Centre of Stream, etc.; Def., Defted; E.K., Edge of Kerb.
 Boundary measurements: F.F., Face of Fence; F.W., Face of Wall; R.H., Root of Hedge; S.R., Side of River, etc.
 Imperial equivalents for metric boundary measurements: 0.91m = 3ft, 1.22m = 4ft.

NATIONAL GRID REFERENCE
 The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:
 EXAMPLE from sheet TQ 0529: TQ 058 291. Take the two letters preceding the sheet number: TQ. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin: 058. Estimate tenths of metres from the grid line to the point (distance in Easting): 8. The resulting four figure number is the Easting: 0588. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin: 291. Estimate tenths of metres from the grid line to the point (distance in Northing): 6. The resulting four figure number is the Northing: 2916. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing: TQ 05882916. For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'.

AREAS
 Area measurement is to plan edge only. The number and arms, in hectares (ha) and acres, is shown within each parcel of land.
 EXAMPLE: 1.807ha area in hectares; 4.47 area in acres.
 When identifying a parcel it is important to specify the number of the plan on which it lies. Enclosures or features joined for measurement of area.
 Limit of area within which individual parcels are not shown.
 To convert hectares to acres multiply by 2.47105.
 To convert acres to hectares multiply by 0.40469.

COMPILED DATA
 Levelled: (a) Surveyed, (b) Reconstituted from former County Series plans and revised, (c) Revised.
 Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.
 Heights are given in METRES above the Mean Sea Level Datum.
 Bench mark list, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
 The representation on this plan of a road, track or path is no evidence of the existence of a right of way.
 The alignment of canals where shown is approximate.
