

Made and published by the Director General of the Ordnance Survey, Southampton.

Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILATION DATA

Levelled: 1958
Boundaries: Jun 1977

(a) New 1976
(b) Reconstructed from former County Series plans and revised.
(c) Revised.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is no evidence of the existence of a right of way.
The alignment of tunnels where shown is approximate.

| | see AREAS notes | | Revision point and bench mark coincident |

BOUNDARIES

| | | | |
|--|---------------------------|--|---------------------------|
| | County | | Region or Islands Area |
| | District | | District |
| | London Borough | | Not shown |
| | Civil Parish (England) | | Electoral Division |
| | Community (Wales) | | Ward |
| | Electoral Division | | Constituency (Co or Boro) |
| | Ward | | Boro Const. Bdy |
| | Constituency (Co or Boro) | | Co Const. Bdy |

Coincident boundaries are shown by the first appropriate symbol above, e.g. Boro Const. & E.D. Bdy.
For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area adjoins.

AREAS
Area measurement is to plan edges only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4267 parcel number
1-507ha area in hectares
4-47 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area are not shown.
Limit of area within which individual parcels are not shown.
To convert hectares to acres multiply by 2.471 05
To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE
The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows—

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number— TQ 058

2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin— 292

3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin— 058

4. The resulting four figure number is the grid reference— 2916

5. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing— 2916 058

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System.'
