1 metre = 3.2808 feet

1 foot = 0.3048 metre

COMPILATION DATA

Levelled 1939
Boundaries Feb 1975

(f) 1:2500 scale * 1:1250 scale (photographically reduced)
(g) Surveyed.
(h) Reconstituted from former County Series plans and revised.
(i) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lines, which may contain later levelling information and particulars of bench marks (a) which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation of a road, track or path is evidence of the existence of a right of way.
The alignment of tunnels where shown is approximate.

AREAS

Area measurement is to plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4267 parcel number
1.809ha area in hectares
4.47 area in acres
To convert hectares to acres multiply by 2.471 05
To convert acres to hectares multiply by 0.404 69

When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area 058
Limit of area within which individual surveys are not shown 058
To convert hectares to acres multiply by 2.471 05
To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows—

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number TQ

2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin 058

3. Estimate tenths of metres from the grid line to the point (distance \approx) 8

4. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin 291

5. Estimate tenths of metres from the grid line to the point (distance \approx) 6

The resulting four figure number is the Northing 2916

6. Take the top metre reference is given by writing first the letters followed by the Easting and then by the Northing TQ 0582916

For further information see "An Introduction to the Projection for Ordnance Survey Maps and the National Reference System"

Imperial equivalents for metric boundary markings
0.1m = 3.94 in
1.25m = 4 1/4 in

VEGETATION CLASSIFICATION: Where space permits, tree and scrub symbols in woods are shown in groups of four, three, two or single to indicate close, medium, open or scattered density of trees or scrub.
