 HECTARES-ACRES

NATIONAL GRID REFERENCE:  
 The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:  
 1. Take the two letters preceding the sheet number. EX: SU 0436-05  
 2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. The resulting four figure number is the Easting. 291  
 3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. The resulting four figure number is the Northing. 291  
 4. The full six figure reference is given by writing first the Easting, followed by the Northing and then the Northing. EX: SU 0436 291 291  
 For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System.' TQ 058539.16
