COMPILED DATA

Levelled..... 1958
Boundaries..... Dec 1974

1:2500 scale * 1:1250 scale (photographically reduced)

(a) Surveyed
(b) Reconstructed from former County Survey plans and revised
(c) Revised

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum

Boundary mark lists, which may contain later levelling information and particulars of bench marks, are available from the Director General, Ordnance Survey.

Representation of a road, track or path is evidence of the existence of a right of way. The alignment of a road where shown is approximate.

BOUNDARIES

Where boundaries coincide the symbol shown is the first applicable in the table above, e.g. Borough Const. & ED Bd.

For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area adjoins.

AREAS

Area measurement is to plan edge only.

The number and area, in hectares (ha) and acres, is shown within each parcel of land.

The limiting four figure number is the Easting.

Limit of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2.471 05

To convert acres to hectares multiply by 0.404 69

EXAMPLE: 4.267 parcel number
1.907ha area in hectares
4.7 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.

Enclosures or features joined for measurement of area are shown as follows:

Limit of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2.471 05

To convert acres to hectares multiply by 0.404 69

EXAMPLE from sheet TQ 0529

- Take the two letters preceding the sheet number. TQ 058
- Take the west edge of the grid square in which the point lies and read the figure opposite that line on the north or south margin. 08
- Estimate tenths of metres from the grid line to the point (distance ab). 088
- Take the south edge of the grid square in which the point lies and read the figure opposite that line on the east or west margin. 291
- Estimate tenths of metres from the grid line to the point (distance cd). 6
- The resulting four figure number is the Northing. TQ 088291
- Follow the Easting and then the Northing.
