(B) Dec 1976

1:2500 scale * 1:1250 scale (photographically reduced)

(a) Surveyed.
(b) Reconstructed from former County Series plans and revised.
(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain laser levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.
The alignment of roads where shown is approximate.

Imperial equivalents for metric boundary markings
9.14m = 30 feet
1.22m = 4 feet

AREAS

Area measurement is to plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE:
4267 parcel number
1.807ha area in hectares
4.47 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area 0588
Limit of area within which individual parcels are not shown 0588
To convert acres to hectares multiply by 0.4047
To convert hectares to acres multiply by 2.47105

NATIONAL GRID REFERENCE

The grid lines form part of a National Grid and are at 100 metre intervals. To give a unique reference defining the position of a National Grid square use the following:

1. Take the two letters preceding the sheet number TQ 059
2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin 0588
3. Take the easting edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin 291
4. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing TQ 05882916
