 1.22m = 4ft

Area measurements are to plan edge only. The number and area in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4267 parcel number, 80700 area in hectares, 2.47 area in acres.

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area. Limits of area within which individual parcels are not shown. To convert hectares to acres multiply by 2.471 05. To convert acres to hectares multiply by 0.404 69.
