

Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILED DATA

Levelled 1952
Boundaries May 1975

1:2500 scale * 1:1250 scale (photographically reduced)

(a) Surveyed
(b) Reconstructed from former County Series plans and revised
(c) Revised

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Mean Sea Datum.
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation of this plan of roads, tracks or paths is evidence of the existence of a right of way.
The alignment of roads where shown is approximate.

SYMBOLS

	Non-coniferous trees		Slopes
	Coniferous trees		Cliff
	Surveyed trees		Cave entrance
	Orchard trees		Rock
	Coppice cover		Boulders
	Scrub		Shaping history
	Heath		Roofed building
	Bracken & rough grassland		Glasshouse
	Marsh		Archway
	Saltings		Change of boundary meeting
	Reeds		see AREAS notes

BOUNDARIES

	Parish boundary		Site of antiquity
	County boundary		Culvert
	London Borough boundary		Direction of water flow
	Civil Parish (England) boundary		Pylon
	Community (Wales) boundary		E.T.L. Electricity Transmission Line
	Electoral Division boundary		Triangulation station
	Constituency (Co or Boro) boundary		Traverse station (permanent)
			Bench mark
			Surface level
			Coincident boundaries are shown by the first appropriate symbol above, e.g. B.P. for Boundary Post and Pylon.

ENGLAND & WALES

B.B.	Base of Bank	C.B.	Centre of Road, etc.	F.F.	Face of Fence	T.B.	Top of Bank
C.B.	Centre of Bank	C.S.	Centre of Stream, etc.	F.W.	Face of Wall	T.H.	Track of Hedge
C.C.S.	Centre of Covered Stream	Df	Delimited	R.H.	Roof of Hedge	T.S.	Track of Stream
C.D.	Centre of Drain, etc.	E.K.	Edge of Kerb	S.R.	Side of River, etc.	Ud	Undefined

SCOTLAND

	Region or Island Area		Electoral Division
	District		Ward
	Not shown		Constituency (Co or Boro)

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number. TQ 058

2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. Estimate tenths of metres from the grid line to the point (distance 4.7). The resulting four figure number is the Easting. 0588

3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. Estimate tenths of metres from the grid line to the point (distance 2.1). The resulting four figure number is the Northing. 2914

4. The full ten metre reference is given by writing first the letters followed by the Easting and then by the Northing. TQ 05882914

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'.

CONVERSION SCALES

HECTARES/ACRES

METRES/FEET

1 metre = 3.2808 feet
1 foot = 0.3048 metre

One grid square on this plan represents one hectare.

AREAS

Area measurement is to plan edge only. The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4267 parcel number
4.47 area in hectares
11.02 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area.

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number. TQ 058

2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. Estimate tenths of metres from the grid line to the point (distance 4.7). The resulting four figure number is the Easting. 0588

3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. Estimate tenths of metres from the grid line to the point (distance 2.1). The resulting four figure number is the Northing. 2914

4. The full ten metre reference is given by writing first the letters followed by the Easting and then by the Northing. TQ 05882914

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'.
