

△ HBRG

Made and published by the Director General of the Ordnance Survey, Southampton.

Levelled ..... 1939  
Boundaries ..... Apr 1975

1:2500 scale (a) Surveyed (b) Reconstructed from former County Series plans and revised (c) Revised

1:1250 scale (photographically reduced)

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

Bench mark lists, which may contain level information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey. This representation on this plan of a road, track or path is no evidence of the existence of a right of way. The alignment of tunnels where shown is approximate.

Where boundaries coincide the symbol shown is the first applicable in the table above, e.g. -

For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area adjoins.

New boundary symbols adopted for England and Wales 1974.

Boundary markings

Face of Fence

Face of Wall

Trunk of Hedge

Side of River, etc.

Imperial equivalents for metric boundary markings

0.91m = 3ft 0in

1.22m = 4ft 0in

Misale and published by the Director General of the Ordnance Survey, Southampton.

Area measurement is to plan edge only.

The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4867 parcel number 18099ha area in hectares 4847 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.

Enclosures or features joined for measurements of area.

Limits of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2.471 05

To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows -

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number. TQ 058

2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. Estimate tenths of metres from the grid line to the point (distance 4). 058

3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. Estimate tenths of metres from the grid line to the point (distance 10). 291

4. The full ten metre reference is given by writing first the letters, followed by the Easting and then the Northing. TQ 058291

For further information see an introduction to the Projection for Ordnance Survey Maps and the National Reference System.
