VEGETATION CLASSIFICATION

Where space permits, tree and scrub symbols in woods are shown in groups of four: three, two or singly to indicate close, medium, open or scattered density of trees or scrub.

CONVERSION SCALES

HECTARES-ACRES

1 Hectare = 2.47105 Acres

1 Acre = 0.40469 Hectares

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number. TQ 0529

2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. 058

3. Estimate tenths of metres from the grid line to the point (distance 0.8). 0588

4. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. 291

5. Estimate tenths of metres from the grid line to the point (distance 0.6). 2916

The resulting four figure number is the Northing. 05882916

6. The full six figure reference is given by writing first the letters, followed by the Easting and then by the Northing. TQ 05882916
