

Made and published by the Director General of the Ordnance Survey, Southampton.

Made and published by the Director General of the Ordnance Survey, Southampton.

**COMPILATION DATA**

(a) 1:2500 scale	(b) 1:1250 scale (photographically reduced)
(1) Surveyed	(2) Reconstituted from former County Series plan and revised.
(3) Revised	

Levelled: 1957.58  
Boundaries: Dec 1974

Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.

Bench mark lists, which may contain later levelling information and particulars of bench marks, (a) which no values have been shown, are obtainable from the Director General, Ordnance Survey.

(b) representation on this plan of a road, track or path is evidence of the existence of a right of way.

The alignment of tunnels where shown is approximate.

**SYMBOLS**

	Non-coniferous trees		Site of antiquity
	Coniferous trees		Culvert
	Surveyed trees		Direction of water flow
	Orchard trees		Electricity pylon
	Coppice cover		E.T.L. Electricity Transmission Line
	Scrub		Triangulation station
	Rough building		Traverse station (permanent)
	Glasshouse		Bench mark
	Archway		Surface level
	Change of boundary merings		Revision point
	See AREAS notes		Revision point & bench mark coincident

**BOUNDARIES**

	England & Wales County Boundary		Scotland Geographical County Boundary
	London Borough County of the City Boundary		Burgh Boundary
	Civil Parish Boundary		District Boundary
	Electoral Division Boundary		Civil Parish Boundary
	Ward Boundary		Burgh Council Ward Boundary
	Borough Council Boundary		County Council Boundary
	County Boundary		County Boundary

Where boundaries coincide the symbol shown is the first applicable in the table above, e.g. Borough & ED Bdy.

For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area adjoins.

New boundary symbols adopted for England and Wales 1974

**AREAS**

Area measurements are to plan edge only. The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4267 parcel number 8079ha area in hectares 4.67 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features pointed for measurement of area. Limit of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2.47105

**NATIONAL GRID REFERENCE**

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE from sheet TQ 0519

- Take the two letters preceding the sheet number TQ 0519
- Take the north edge of the grid square in which the point lies and read the figure opposite that line on the north or south margin. The resulting four figure number is the Easting. 291
- Take the south edge of the grid square in which the point lies and read the figure opposite that line on the east or west margin. The resulting four figure number is the Northing. 2916
- The full ten metre reference is given by writing first the letters followed by the Easting and then by the Northing. TQ 05192916

For further information see an introduction to the Projection for Ordnance Survey Maps and the National Reference System.
