**COMPILED DATA**

Levelled.....1957  
Boundaries...Oct 1976

(a) 1:2500 scale  
(b) 1:2500 scale (photographically reduced)  
(c) Surveyed  
(d) Reconstructed from former County Series plans and revised  
(e) Revised

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.  
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.  
The representation on this plan of a road, track or path is no evidence of the existence of a right of way.  
The alignment of tunnels where shown is approximate.

**SYMBOLS**

	Non-coniferous trees		Slopes
	Coniferous trees		Cliff
	Surveyed trees		Cave entrance
	Orchard trees		Rock
	Coppice cover		Boulders
	Scrub		Shaping masonry
	Heath		Roofed building
	Broken rough grassland		Glasshouse
	Marsh		Archway
	Saltings		Change of boundary merging
	Reeds		see AREAS notes
	Site of antiquity		Culvert
	Direction of water flow		Pylon
	Electricity Transmission Line		Triangulation station
	Traverse station (permanent)		Bench mark
	Surface level		Revision point
	Revision point & bench mark coincident		

**BOUNDARIES**

England & Wales boundaries are shown by the first appropriate symbol above, e.g., Boro. Colln. & E.D. Bdy.

	Base of Bank		Face of Force
	Centre of Bank		Face of Wall
	Centre of Covered Stream		Root of Hedge
	Centre of Drain, etc.		Side of River, etc.
	Boundary merings		Top of Bank
	Face of Fence		Track of Hedge
	Face of Wall		Track of Stream
	Root of Hedge		Undefined
	Side of River, etc.		

Imperial equivalents for metric boundary merings:  
0.91m = 3ft. 1.22m = 4ft.

**AREAS**

Area measurement is to plan edge only.  
Enclosures or features joined for measurement of area are shown within each parcel of land.  
The number and area, in hectares (ha) and acres, is shown within each parcel of land.  
EXAMPLE: 4267 parcel number  
1.859ha area in hectares  
4.47 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.  
Enclosures or features joined for measurement of area are shown within each parcel of land.  
Limit of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2.471 05  
To convert acres to hectares multiply by 0.404 69

**NATIONAL GRID REFERENCE**

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows—

EXAMPLE from sheet TQ 0529

- Take the two letters preceding the sheet number TQ 058
- Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. Estimate tenths of metres from the grid line to the point (distance 41) 058
- Take the south edge of the grid square in which the point lies and read the figures opposite the line on the east or west margin. Estimate tenths of metres from the grid line to the point (distance 16) 058
- Take the full ten metre reference as given by writing first the letters followed by the Easting and then by the Northing. The resulting four figure number is the Easting. To convert to the National Reference System
