

ORDNANCE SURVEY

HEIGHTS IN METRES

PLAN SU 0841-

NATIONAL GRID PLANS Scale 1:2500

SU 0841-0941

Drawn by Salisbury District Council from unpublished survey information supplied by the Ordnance Survey

One grid square on this plan represents one hectare. Area measurement is to plan edge only. Enclosures or features joined for measurement of area. The number and area, in hectares (ha) and acres, is shown within each parcel of land.

COMPILED DATA
1 December 1976
Levelled Boundaries
1:2500 scale * 1:1250 scale (photographically reduced)
(a) Surveyed
(b) Reconstituted from former County Series plans and revised.
(c) Revised.
Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.
HEIGHTS are given in METRES above the Newlyn Datum.
Bench marks (BM), which may contain later levelling information and adjustments of bench marks to which no figures have been shown, are obtainable from the Director General, Ordnance Survey.
The representation of a road, track or path is no evidence of the existence of a right of way.
The alignment of tunnels where shown is approximate.

ABBREVIATIONS table listing symbols for various features like Bear House, Bench Mark, Boundary Point, etc.

SYMBOLS table listing symbols for various features like Non-coniferous trees, Coniferous trees, Surveyed trees, etc.

BOUNDARIES table listing symbols for various boundaries like England & Wales, Scotland, County Boundary, etc.

NATIONAL GRID REFERENCE
The grid lines form part of the National Grid and are at 100 metres intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:
EXAMPLE from sheet TQ 0829
1. Take the two letters preceding the sheet number: TQ 0829
2. Take the west edge of the grid square in which the point lies and read the figures opposite that line on the north or south margin. Estimate tenths of metres from the grid line to the point (distance =) 018
3. Take the south edge of the grid square in which the point lies and read the figures opposite that line on the east or west margin. Estimate tenths of metres from the grid line to the point (distance =) 291
The resulting four figure number is the National Grid Reference: TQ 0829 2918
4. The full six figure reference is given by writing four letters, followed by the Easting and then by the Northing. TQ 082918 2918
For further information see 'An Introduction to the Provision for Ordnance Survey Plans and the National Reference System.'
