Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILATION DATA

Levelled	1958
Boundaries	Jul 1976

(a) Surveyed, (b) Revised. Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum. Bench marks, lists, which may contain laser levelling information and particulars of bench marks to which the values have been shown, are obtainable from the Director General, Ordnance Survey. The representation on this plan of a road, track or path is no evidence of the existence of a right of way. The alignment of tunnels where shown is approximate.

Details of symbols and abbreviations used can be obtained from Ordnance Survey, Southampton.

BOUNDARIES

ENGLAND & WALES	SCOTLAND
County	Region or Islands Area
District	District
London Borough	Not shown
Civil Parish (England)	
Community (Wales)	Electoral Division
Electoral Division	Ward
Ward	Constituency (Co or Burgh)
Constituency (Co or Boro)	

Coincident boundaries are shown by the first appropriate symbol above, e.g. Boro Const & E.D. Bdy. For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area adjoins.

BOUNDARY MERINGS

BB	Centre of Road, etc.	FF	Face of Fence	TB	Top of Bank
CB	Centre of Bank	FW	Face of Wall	TKH	Track of Hedge
CSS	Centre of Covered Stream	RH	Root of Hedge	TKS	Track of Stream
CD	Centre of Drain, etc.	EK	Edge of Kerb	Und	Undefined

Imperial equivalents for metric boundary merings
0.91m = 3ft 1.22m = 4ft

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows: EXAMPLE from sheet TQ 0529 SE

- Take the two letters preceding the sheet number TQ
- Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. Estimate tens of metres from the grid line to the point (distance e) 058
- Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. Estimate tens of metres from the grid line to the point (distance n) 291
- The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing TQ 0582916

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'

One grid square on this plan represents one hectare on the ground. To convert hectares to acres multiply by 2.471 05
