NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE: G in Normanton Gorse

EASTING	414	NORTHING	414
Take west edge of 100 metre square in which point lies and read the figure opposite this line on the north or south margin.	113	Take south edge of 100 metre square in which point lies and read the figure opposite this line on the east or west margin.	5
Estimate tens of metres from grid line to the point	118	Estimate tens of metres from grid line to the point	4145

TEN METRE REFERENCE: SU 11384145
