PLAN SU 1222

PLAN SU 1222

REFERENCE

For fuller information see Reference Card published separately.

NATIONAL GRID REFERENCE

The lines on the plan form part of the National Grid and are spaced at 100 metre intervals.
To give a large scale reference defining the position of a point to the nearest 10 metres proceed as follows:-

| EXAMPLE: P in Pond | |
|---|--|
| EASTING | NORTHING |
| Take west edge of square in which point lies and read the figures opposite this line on NORTH and SOUTH margins | Take south edge of square in which point lies and read the figures opposite this line on EAST and WEST margins |
| Estimate tens of metres from the grid line | Estimate tens of metres from the grid line |
| 129 | 222 |
| 2 | 6 |
| TEN METRE REFERENCE: SU 12922226 | |

For further information see "The Projection for Ordnance Survey Maps and Plans and the National Reference System".
The representation on this plan of a road, track or footpath is no evidence of the existence of a right of way.

Parcels of land to which acreages are shown, are numbered with the Ten metre NG Reference of the approximate centre of the parcel. 1 square inch on this plan represents 996 acres on the ground.

- Antiquities (Site of) \oplus
 - Change of boundary mering \ominus
 - Perimeter of built up area \square
 - Bench Mark \uparrow
