COMPILATION DATA

(a) Apr 1954	Levelled	1958, 59
(b) Feb 1960	Boundaries	Feb 1973
(c) Jul 1970		

1:2500 scale * 1:1250 scale (photographically reduced)

(a) Surveyed.

(b) Reconstituted from former County Series plans and revised.

(c) Revised.

With further information added in 1973

Roads and houses added since the date of revision are not named or numbered.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.

Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.

The alignment of tunnels where shown is approximate.

		M.P.U.	Mail Pick-up	S.Br.	Signal Bridge		

Made and published by the Director General of the Ordnance Survey, Southampton.

AREAS

Area measurement is to plan edge only. The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4267 parcel number; 1-809ha area in hectares; 4-47 area in acres.

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area are not shown. To convert hectares to acres multiply by 2.47105. To convert acres to hectares multiply by 0.40469.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE from sheet TQ 0529

- Take the two letters preceding the sheet number. TQ
 - Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. 058
 - Estimate tens of metres from the grid line to the point (distance). 8
 - The resulting four figure number is the Easting. 0588
 - Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. 291
 - Estimate tens of metres from the grid line to the point (distance). 6
 - The resulting four figure number is the Northing. 2916
 - The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing. TQ 05882916.
- For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System.'

VEGETATION CLASSIFICATION. Where space permits, tree and scrub symbols in woods are shown in groups of four, three, two or singly to indicate close, medium, open or scattered density of trees or scrub.

Imperial equivalents for metric boundary markings
0.91m = 3ft 3.66m = 12ft
