

COMPILATION DATA

Levelled 1958
 Boundaries May 1973.

(b) Revised.

Heights given in METRES above the Newlyn Datum. Plans, which may contain laser levelling information and bench marks to which no values have been shown, are from the Director, General, Ordnance Survey.

Boundary symbols adopted for England and Wales 1974 are reference Card available from Agents.

Representation on this plan of a road, track or path is evidence of the existence of a right of way.

Location of tunnels where shown is approximate.

SYMBOLS

- Site of antiquity
- Change of boundary mering
- Culvert
- Direction of water flow
- Electricity pylon
- ETL - Electricity Transmission Line
- Triangulation station
- Traverse station (permanent)
- Bench mark
- Surface level
- Revision point
- Revision point & bench mark coincident

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

- Take the two letters preceding the sheet number..... TQ
- Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin..... 058
- Estimate tens of metres from the grid line to the point (distance n)..... 8
- The resulting four figure number is the Easting..... 0588
- Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin..... 291
- Estimate tens of metres from the grid line to the point (distance n)..... 6
- The resulting four figure number is the Northing..... 2916
- The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing..... TQ 0588 2916

For further information see "An Introduction to the Projection for Ordnance Survey Maps and the National Reference System."
